COLOR HARDENER

Available 26 kg Plastic Pail and 25 kg Bag Packaging. Coverage 3,5-4 kg/m²

Flex-C-Ment Color Hardener is a dry shake, color hardener that is applied to the surface of freshly placed concrete. It is a cementitious-based coloring material that may be used to create abrasion resistant interior floors and freeze-thaw stable exterior hardscapes. The time-tested formulation of Flex-C-Ment Color Hardener creates an extremely dense surface that is resistant to foot and vehicular traffic, and extreme weather. It is available in 32 color options. Properties of Flex-C-Ment™ Color Hardener:

Values below are test result undertaken by construction materials laboratory of Ready Mix Concrete Union of Turkey, an institute accredited by TURAK (Turkish Accreditation Agency).

PONDER RELEASE AGENT

Release Agent for Stamp Concrete Applications. Available in 20 kg packages
Coverage 100-150 gram/m²

Powder Release Agent is a color powdered bond breaker used with stamping mats, texturing skins and texture rollers. It also provides accent colors that complement or contrast with the underlying concrete surface. Additionally, it enhances the transfer of the detailed pattern and texture, and prolongs the surface life of the stamping mat or texturing tool. It is compatible with integrally colored concrete, color hardened concrete and stampable cementitious overlays. Antiquing Release is a finely ground, streak free powder that is a blend of UV-resistant pigments and water repelling additives. It is broadcast over the concrete surface prior to placing the stamping or texturing tools. As the imprinting tool is pressed into the plastic concrete surface, a portion of the Antiquing Release is embedded into the textured surface of the concrete. As the tool is removed, it breaks cleanly, without marring the colored concrete surface. Upon washing and sealing, the difference in color between the base concrete and the release creates a visually attractive, antiquing look to the concrete. The added color visually enhances the depth of the texture. The amount of release agent retained on the concrete will vary. Antiquing Release can be used in matching or contrasting colors to create a variety of effects.
